A great addition to the trilogy, though I have to add I enjoyed both Avernum and Geneforge more. If you are thinking about buying a SpiderWeb game, go with Escape from the Pit/Crystal Souls or Geneforge 4/5 first. Those are the best ones in my opinion.

The updated skill trees and abilities are amazing, and allow you to create much better and more customized characters, but how mana (vitality) now works really limits sorcerers and tinkermages. Until you get to a very high level the tinkermage can only summon one turret at a time due to the new mana constraints, which really takes away from the temporal pylon/healing pylon (or throw in the fire/ice turret for more DPS) combo which made it such a devastating class. I found that combat slowed down and felt more like a slog or a chore due to the mana changes, but overall it was still fun.

One other small complaint, I wish the game was set in the middle of the Age of Chaos, rather than at the end. It is weird but it felt like the game was tired and just wanted to end. I would much rather have infiltrated the Far Lands and fought battles behind enemy lines, or carried out special missions to disrupt plans and have a visible impact on the more major battles occurring on the front lines. Instead this takes place at the very end, you just hunt down the last of the rebel forces, which had an air of 'just get it all over with.'

Not the best SpiderWeb game, not even the best game in the Avadon trilogy, but still a solid enjoyable game.. I dig the competitive tennis if the network stuff works.. Spend your time running away from spirits as they literally harass you with words and damage your "energy" meter. When you look at the description for this game, it says "RPG;" alas, it's not quite the RPG you think it is. This is moreso an adventure game with a turn-based twist that has a few RPG "elements" thrown in. This game feels more like a point-and-click game on the surface, but the RPG mechanics and battle system kinda seem like an afterthought.. Worth every penny, because it doesn't cost a lot of pennies.

It does one thing, and it does that one thing very well. It's challenging, but when you can get a groove going, it feels very relaxing.. This SHMUP is awesome!, that mix between the shield and the short/long range shot it's simply beautiful and organic; i'm not gonna lie, my first try in this game was via piracy, and it took me less than 5 minutes to decide that it would be mine forever!!!

P.S: Awesome, i repeat, AWESOME OST!!! (Original & Arrange)

A MUST BUY FOR ANY SHMUP PLAYER.. A Limerick:

There once was a good friend of mine
Who tried to play Crysis one time
As the first level loaded
His PC exploded
And the keyboard's still lodged in his spine

Good game, fun. Cute design of the game. Everything is clear, interesting. How to pass the second stage?. Really good story and atmosphere!

There are absolutly no jumpscars, but it's a good dark story with some flashbacks of her life with well chosen ambient sounds. It's absolutly worth the money, but don't expect real horror. It's more exploration, story telling and psychological horror.

Support the developers and enjoy the storyline!. Overall, it's a fun VR boxing style workout. If that's what you're looking for, then go for it. Personally, it motivated me to find new ways to workout. All the humidity from sweating worried me, as it would be all over the inside of the goggles. If you don't mind cleaning out all the nooks and crannies, it's worth having. This more or less taught me I don't really want to use my headset for working out.. Awesome idea; I love it! VR Surviving is interesting and intriguing. Can't wait when the game will be finished. Bought it to support Alex.

Keep it up :). Great game! It was a rainy day here and my son and I still got to play paintball in VR. Gotta get the paintball fix! one suggestion, Play vs. other VR players. The bots are OK but would love to play against other VR players, with voice chat.. The updates to this game is slow, the price is awful it should at least be \$15 or even sadly \$10 since it's still early access. I can see this ending up in early access hell just because it doesn't seem like the devs are really trying to push out updates to make this game better. it can get a good 2 hours and you pretty much beat the game if you figure it out with ease. It's very easy understanding game and it has a something other's don't have which is actually managing a haunted house! It'll be a no for me untill I see more updates come out..
